I am an experienced web developer who is comfortable working on both the front-end and the back-end. I have built many websites using WordPress, including e-commerce sites, and several bespoke applications using Laravel. I enjoy learning new technologies and solving problems as well as trying to give the end-user the easiest experience possible.

Core Skills
- Programming languages including: HTML, JavaScript, CSS, PHP
- Comfortable working with frameworks and content management systems such as Laravel and WordPress.
- Able to create easy-to-use solutions for clients.

Work Experience

GetExtra - June 2016 - present

Outline: Working as the sole, full-stack developer building both websites and web applications.

Key Responsibilities:
- Developing client projects to specification and ensuring they have the best user experience possible.
- Thinking of the best ways in which to solve a problem.
- Communicating with the client and ensuring issues are fixed.
- Helping out with the design of sites and web application dashboards

Core Tools: WordPress, Laravel, PHP, JavaScript, HTML, CSS, SASS, Photoshop, Git, Advanced Custom Fields

Achievements:
- Built a large scale Laravel application used for managing clients, monitoring industrial systems, internal testing and generating PDF reports.

Professional development
- Regularly watch lessons on Udemy
- Build personal projects
